

JS Humidifiers plc

Planned Maintenance Agreements

Efficient performance & extended product life

Tailored
to your site's
requirements

A JS Planned Maintenance agreement will protect the investment you have made in your humidifier equipment by ensuring it runs effectively, efficiently and safely.

JS engineers are fully trained to service all makes and models of humidifier and can provide cost effective maintenance solutions. This means you can concentrate on your core business activities, rather than be distracted by humidifier maintenance issues.

The benefits

- Increased humidifier reliability
- Energy savings
- Optimum performance
- Extended product life
- Maximum humidity control

HVCA

Tailored to your site's requirements

Each planned maintenance agreement is tailored to your site's specific requirements. From one scheduled visit per year to a permanently onsite specialist engineer, our maintenance agreements will suit all sites and give you the humidification performance you need.

How your schedule is agreed

Your maintenance schedule will be based on the number and type of humidifiers on your site, the water quality being used, the hours of operation and their pattern of use.

You can also decide on your level of in-house involvement. If you would like to manage regular checks and routine maintenance but would like an expert to perform specialist maintenance, the schedule of visits will reflect

this. Likewise if you would like to fit and forget your humidifiers then our flexible planned maintenance will make this possible.

How you benefit

By having your humidifiers maintained by experts they will perform efficiently and hygienically, they will have an extended service life and you will also receive these additional benefits:

- Extended warranties
- Reduced rate for labour
- Reduced rate for spare parts
- Recommended spares lists
- Service history reports
- Free technical advice & telephone support
- Professional advice on your humidifier's L8 requirements

Other after-sales services

We offer free on-site humidifier health checks

Installation & project management

Our nationwide installation team is highly experienced in best practice humidifier installation and trained on all makes and models of humidifier, not just our own.

As well as installation of the unit our specialists will manage the project through to commissioning, overseeing project scheduling, equipment delivery and liaison with all other relevant contractors.

Humidifier commissioning

Once a humidifier has been installed, a JS commissioning engineer will verify all connections and liaise with the controls contractor to organise the unit's testing. After this, the output will be checked and the humidity monitored to ensure the unit performs and will continue to perform exactly as per specifications.

Help with your L8 requirements

Under the Health & Safety Executive's ACoP L8, the control of legionella bacteria in water systems, you have legal requirement to carry out risk assessments in association with your humidification system. We are able to assist you with this and give advice on an appropriate water-testing regime.

We can also undertake system disinfection procedures and assist you with bringing old humidifier systems up to date with current best practice.

Spare parts

JS Humidifiers Spare Parts division supplies a huge range of replacement humidifier components largely available from stock. Our experienced technicians will help you identify which part you require and, when available, get it to you the very next day.

Parts for all makes and models of humidifier are stocked including:

Neptronic	Spirax	Nordmann
ElectroVap	Condair	Carel
HumEvap	Axair Climate	Hygromatik
Calomax	Airedale	Vapac
Armstrong	Munters	HumiPac
JetSpray	Herrmidifier	Defensor
Coolfog	Draabe	R-Tech

Breakdown response

Our nationwide network of engineers provide fast, responsive service in the event of your humidifier malfunctioning. Engineers carry a large selection of common replacement parts in their vans and are fully trained on all makes and models of humidifier.
